[^0]
## Portfolio Recap - Market Drivers

## Economy

- U.S. GDP accelerated at $2.6 \%$ in the third quarter, the first expansion reading after two consecutive quarters of negative readings. A narrowing trade deficit and increases in consumer spending and government outlays boosted the number.
- In October, inflation slowed notably with CPI up $7.7 \%$ vs. market expectations of $7.9 \%$. Core CPI, which excludes volatile energy and food prices, climbed $6.3 \%$ in October from a year earlier, down from $6.6 \%$ in September, and less than market estimates of $6.5 \%$.
- The labor market remained strong in the third quarter and robust in October, in the final glimpse at the state of the economy ahead of midterm elections. Although the unemployment rate rose to $3.7 \%$, Americans are still seeing rapid wage gains. The economy added 261,000 jobs in October, exceeding economists' projections, while September results were revised higher to 315,000 from 263,000.

## U.S. Treasury Yields

- Yields on U.S. Treasuries continued their relentless ascent higher. The yield on the 10 -year U.S. Treasury rose to $4.05 \%$ by quarter-end, an increase of 140 basis points ( $1.40 \%$ ) from July $31^{\text {st }}$. The yield on the 2 -year Treasury ended the fiscal quarter even higher at $4.49 \%$, up 160 basis points ( $1.60 \%$ ) from the start of the quarter.

## Federal Reserve

- The third quarter saw two more aggressive Fed interest rate hikes of $0.75 \%$ each- one in July and the other in September. Following these two rate hikes was another $0.75 \%$ rate increase at the FOMC meeting in early November. The federal funds rate now stands at a target range of $3.75 \%-4.00 \%$; the highest level since 2008.
- With both the CPI and Producer Price ("PPI") reports showing positive signs of slowing in October, the Fed continues to remain cautious and hawkish as inflation remains considerably above trend.

## Portfolio Recap - Performance \& Cash Flows

## Longer-Term Funds.

- Yields rose sharply during the quarter, leading to negative absolute performance for longer-duration strategies.
- Similar to the prior two quarters, we maintained duration positions that were shorter than benchmarks as yields continued to move higher on stubbornly persistent inflation and expectations for aggressive Fed rate hikes.
- For this reason, despite historically poor bond market performance, incremental performance was quite strong as defensive durations and diversification buoyed performance relative benchmark.
- Longer-term strategies outperformed benchmarks by 29-56 bps ( $0.29 \%-0.56 \%$ ) for the quarter.

## - Short-Term Funds

- The 2003 Pledged Revenue Fund and Project Operating Fund showed positive absolute performance and outperformed the 3 -month U.S. Treasury Bill for the quarter.
- Short-term credit instruments, including commercial paper, continue to offer exceptionally high yields with less rate sensitivity - and therefore less risk - than longer duration investments.
- Each portfolio continues to be structured based on anticipated liquidity needs. We continue to seek high-quality commercial paper issuers in line with BPCA liquidity needs and pockets of value in the current market.

## Investment Policy Issuer Guidelines

| Issuer | Actual (\%) | Actual ${ }^{4}$ (\$) | IPS Limit ${ }^{2}$ | S\&P Rating | Moody's Rating |
| :---: | :---: | :---: | :---: | :---: | :---: |
| U.S. Treasury | 85.52\% | 418,606,677 | 100\% | AA+ | Aaa |
| Federal Home Loan Bank | 3.14\% | 15,353,906 | \$250,000,000 | A-1+ | P-1 |

## IV. Market Commentary

## Summary

- In Q3, U.S. economic conditions were characterized by: (1) persistently high inflation despite recent energy price declines; (2) aggressive interest rate hikes by the Fed; (3) rising Treasury yields and two-decade-high mortgage rates; (4) further weakening of credit and equity markets; and (5) increasing recession probability.
- Interest rates surged and equity markets fell in reaction to the Fed's aggressive rate hikes designed to combat inflation. Over the first three calendar year quarters of 2022, the S\&P 500 cemented its third worst performance of all time, the U.S. Dollar Index (DXY) had its second strongest year on record, and the 10-year U.S. Treasury experienced its largest net yield gain in 35 years.
- U.S. GDP accelerated at 2.6\% pace in Q3, the first expansion release after two consecutive quarters of negative readings. A narrowing trade deficit and increases in consumer spending and government outlays boosted the number.
- Inflation remained a hot button issue as both key measures - CPI and PPI - came in hotter than expected in September. The consumer price index (CPI) rose $8.2 \%$ year-overyear (YoY) through September, with key contributions from food, energy, transportation and shelter costs. In October, inflation slowed notably with CPI up $7.7 \%$ vs. market expectations of $7.9 \%$. Core CPI, which excludes volatile energy and food prices, climbed $6.3 \%$ in October from a year earlier, down from 6.6\% in September, and less then market estimates of 6.5\%.
- The third calendar quarter saw two more aggressive Fed interest rate hikes of 0.75\% each- one in July and the other in September. This was followed by another $0.75 \%$ rate increase in early November's FOMC meeting. The federal funds rate now stands at a target range of $3.75 \%-4.00 \%$; its the highest level since 2008 . Prior to this cycle, the Fed had not raised its flagship policy rate by $0.75 \%$ in any single move since 1994 , underscoring its steadfast resolve to fight persistent inflation
Economic Snapshot
- Signs of a recession have increased steadily with probability indexes reaching $60 \%$ and certain industries such as housing showing softening amid a series of hefty rate hikes. But the labor market remains strong and inflation remains high, both signs that have yet to flip, and as a result, Fed Chair Powell noted that "the incoming data since our last meeting suggests the ultimate level of interest rates will be higher than previously expected."
- The labor market remained strong in the third quarter and robust in October, in the final glimpse at the state of the economy ahead of midterm elections. Although the unemployment rate rose to $3.7 \%$, Americans are still seeing rapid wage gains. The economy added 261,000 jobs in October, exceeding economists' projections, while September results were revised higher to 315,000 from 263,000.
- New-home sales fell 10.9\% in September, which marks the fourth time in 2022 that these sales have fallen by $10 \%$ or more from the prior month. Considering multidecade high mortgage rates, mortgage applications to purchase homes also fell $42 \%$ over the year. The average rate on a 30 -year fixed-rate mortgage passed $7 \%$ on Nov. 4th, the first time in more than 20 years.

## Interest Rates

- On the heels of the Fed rate hikes, yields on U.S. Treasuries continued their relentless ascent higher. The yield on the 10-year U.S. Treasury rose to $4.05 \%$ by quarter-end, an increase of 140 basis points (1.40\%) from July 31. The two-year Treasury yield ended the fiscal quarter even higher at $4.49 \%$, up 160 basis points ( $1.60 \%$ ) from $2.89 \%$ at the start of the quarter.
- The U.S. Treasury yield curve has been inverted now for some time between the 2- and 10-year tenors, a metric that is often monitored when evaluating the steepness of the curve. Further, the curve inverted between the 3-month and 10-year tenors for the first time in October since early 2020 - while largely expected, this metric from a macroeconomic perspective is strongly correlated as a sign to near-term economic downturn.
$\rightarrow$ The ICE BofA 2-, 5-, and 10-year U.S. Treasury indices returned $-2.15 \%,-6.12 \%$, and $-10.69 \%$, respectively for the fiscal quarter

## Sector Performance

- Diversification away from U.S. Treasury securities was a mixed benefit for performance in the third quarter. Corporates and asset-backed securities (ABS) helped buoy portfolio performance relative to benchmarks, while mortgage-backed securities (MBS), supranationals and federal agencies all detracted.
- While federal agency non-callable securities continue to offer limited relative value to U.S. Treasuries, callable structures remain attractive from longer-term historical perspective. Liquidity continues to be a challenge in the sector as opportunistic sales have dissipated.
- Short-term credit instruments, including bank CDs and commercial paper, continue to offer exceptionally high yields with less rate sensitivity - and therefore less risk - than longer duration investments.
- Amid economic uncertainty, elevated bond market volatility, and the expectations for the Fed to continue to raise rates over the near term, we plan to maintain our modest defensive duration bias relative to benchmarks.

## Interest Rate Overview

| Maturity | Oct '22 | Jul '22 | Change over <br> Quarter | Oct '21 | Change over <br> Year |

[^0]:    Notes:

    1. Bank of America/Merrill Lynch (BAML) indices provided by Bloomberg Financial Markets. The total returns shown for periods longer than a year are the annualized returns for the stated period.
    
    2. Since inception performance for all portfolios other than 'BPCA Other Post Employment Benefits' and 'BPCPC Other Post Employment Benefits' is calculated from January 31, 2006 to present
    3. For the 'Reserve Fund,' the BAML 1-5 Year Treasury Index became the performance benchmark on July 31, 2013. For prior periods, the BAML 1-10 Year Treasury Index was utilized.
    4. Since inception performance for the 'BPCA Other Post Employment Benefits' is calculated from January 31, 2008 to present.
    5. Since inception performance for the 'BPCPC Other Post Employment Benefits' is calculated from February 12, 2010 to present.
    6. BPCPC Other Post Employment Benefits holdings were transferred and consolidated with BPCA Other Post Employment Benefits holdings on December 23,2021
[^1]:    Notes:

    1. Beginning Period Value is as of July 31, 2022 and Ending Period Value is as of October 31, 2022. Beginning Period Value and Ending Period Value equal market values of portfolio holdings plus accrued interest and cash.
    2. Net Transfers represent the total portfolio contributions and withdrawals during the quarter.
[^2]:    Notes:

[^3]:    Notes:

    1. Market Value includes accrued interest but does not include cash balances held at the bank.
    2. Government MBS includes Freddie Mac, Fannie Mae, Ginnie Mae, and Small Business Administration MBS.
    3. NR holdings are not rated by S\&P but rated by Moody's and are in compliance with BPCA's investment policy.
[^4]:    Notes:

[^5]:    Notes:

    1. End of quarter trade-date market values of portfolio holdings, including accrued interest.
    2. Government MBS includes Freddie Mac, Fannie Mae, Ginnie Mae, and Small Business Administration MBS.
[^6]:    Notes:

    1. Performance on trade-date basis, gross-of-fees in accordance with the CFA Institute's Global Investment Performance Standards.
    2. Bank of America/Merrill Lynch (BAML) indices provided by Bloomberg Financial Markets. The total returns shown for periods longer than a year are the annualized returns for the stated period.
    3. Duration is the change in the value of a security that will result from a $1 \%$ change in interest rates, stated in years.
     for reference only. The actual annual return will be the result of chaining the most recent four quarterly returns.
    4. Since inception performance is calculated from January 31, 2006 to present
[^7]:    Notes:

    1. End of quarter trade-date market values of portfolio holdings, including accrued interest.
    2. Government MBS includes Freddie Mac, Fannie Mae, Ginnie Mae, and Small Business Administration MBS.
