

Travel Advisory

South Battery Park City Resiliency Project

On or about February 5, a portion of the parking lane on Battery Place, between 1st Place and Little West Street, will be used for construction staging. This work is expected to continue through 2024. The Proposed Staging Area (shown in orange on the map) will only impact the parking lane.

The South Battery Park City Resiliency Project (SBPCR) represents one of several projects within the overall Lower Manhattan Coastal Resiliency (LMCR) Master Plan. SBPCR is a BPCA capital project designed to provide flood risk reduction for Battery Park City and Lower Manhattan in response to increasingly frequent and more severe storms. More information about SBPCR can be found at <https://bpcn.ny.gov/sbpcrp/>.

Questions and feedback about SBPCR can be directed to:
