

**Project: BALL FIELDS FOAM PADDING
AND VINYL COVER REPLACEMENT SERVICES**

Date: May 8, 2024

RE: Addendum #1

**# of Pages: 2
(with 2 Exhibits)**

The following revisions and/or clarifications are to be made to the request for proposal (“RFP”) document for Ball Fields Foam Padding and Vinyl Cover Replacement Services. They are the result of questions asked prior to the deadline of May 1, 2024 by 4:00 p.m.

Answers to each question can be found in italics directly below the question.

1. Do you have photographs of the existing padding?

Yes, please see attached Exhibit A: Ball Fields Photographs.

2. Do you have any drawings of the field or any supporting drawings/images you can provide?

Attached as Exhibit B is a drawing utilized in connection with the last padding replacement project. Its inclusion here is not a representation as to its accuracy, or as to the acceptability of the product identified therein. The selected proposer has an obligation to confirm all dimensions prior to procuring the padding and provide its own set of submittals.

3. Is the turf included in this project?

No.

4. What is the process for the coordination of delivery of materials?

Contractors are expected to coordinate deliveries efficiently that coincides with work being performed and minimizes disruption to those utilizing the ball fields. There is approximately 300 square feet (30 feet by 10 feet) of outdoor space within the BPC Ball Fields where material can be stored. Any stored materials will be expected to be stored in a safe manner.

5. Is parking available?

Parking on the Ball Field for a limited number of work vehicles that supplies deliveries, tools and other equipment necessary can be made available onsite with limitations, see below. Any vehicle parked will require a permit through BPCA.

Limitations: No vehicle or heavy load shall exceed 3 psi (static) or 35 psi (dynamic).

6. What is the estimated timeline for work?

BPCA anticipates the contract to be executed in Summer 2024 with work set to begin in late summer/early autumn 2024.

7. Can vehicles or dumpsters be parked on the ball fields?

See answer to question #5

8. Would you please post an addendum with the site visit attendance sign in sheet for this project?

The site walkthrough was attended by Afforda, Inc. and Greenway USA.

EXHIBIT A

(Ball Fields Photographs)

Horizontal pad with vinyl cover showing current level of wear.

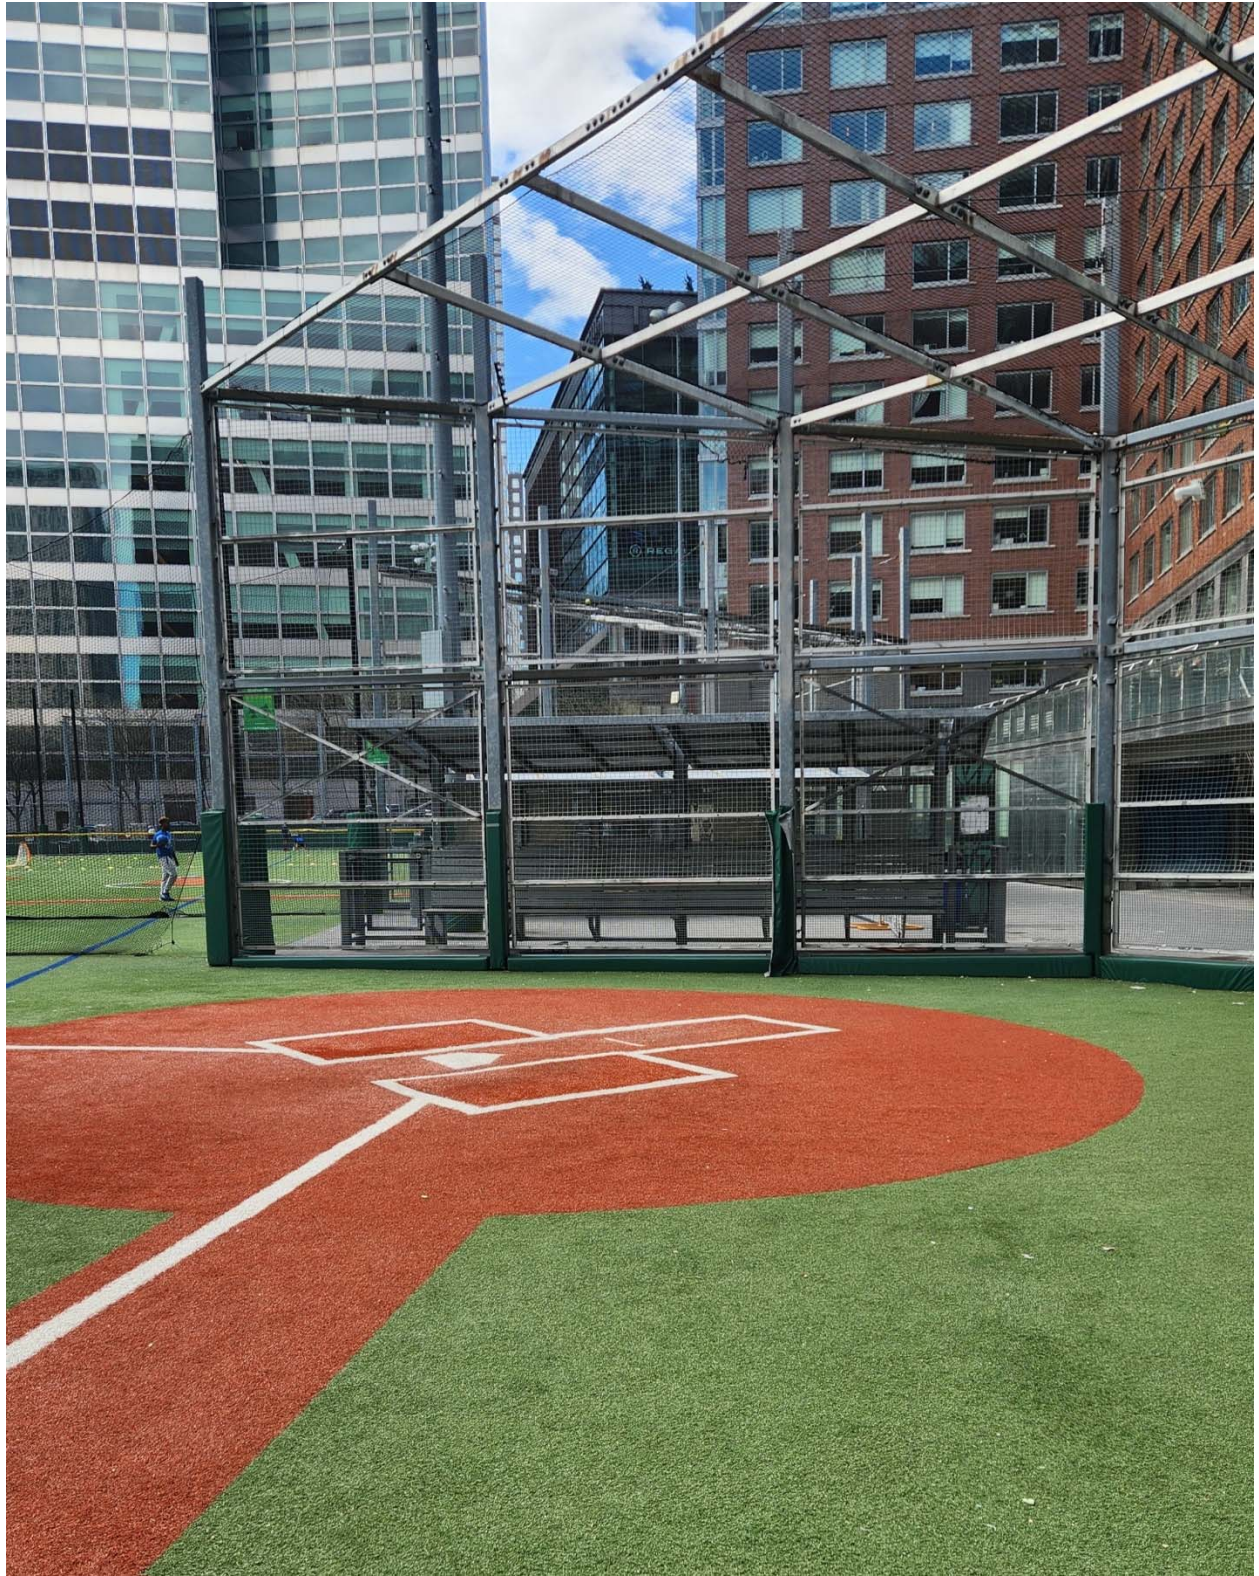

Horizontal pad with Z-bracket mounting hardware visible.

Wall barrier pad showing current level of wear.

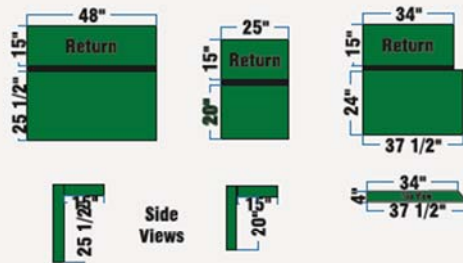

Dugout pad detail

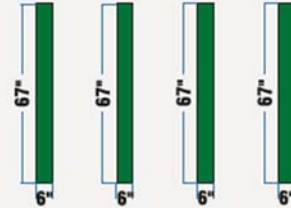

Dugout pad – wide view.

EXHIBIT B

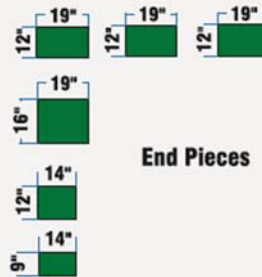

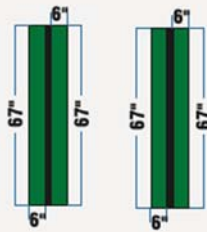

(Available Technical Drawings)

**Vertical Wood Backstop Pads
w/1" Lip Top & Bottom**

**Vertical Wood Backstop Corner Pads
w/1" Lip Top & Bottom**
