

Travel Advisory

South Battery Park City Resiliency Project

Starting Monday, October 7, there will be a Con Edison-required gas main relocation at the intersection of Battery Place and First Place (shown in orange on the map). This work will be performed in approximately 40 linear feet of roadway. Flaggers will be in place while work is ongoing. Traffic will be maintained in each direction.

The work hours will be weekdays from 7AM to 4PM, with work expected to continue through November 15. Demolition involving the use of jackhammers will take place the first week.

The South Battery Park City Resiliency Project (SBPCR) represents one of several projects within the overall Lower Manhattan Coastal Resiliency (LMCR) Master Plan. SBPCR is a BPCA capital project designed to provide flood risk reduction for Battery Park City and Lower Manhattan in response to increasingly frequent and more severe storms. More information about SBPCR can be found at <https://bpca.ny.gov//sbpcrp/>.

Questions and feedback about SBPCR can be directed to:
