Notes:

1. Bank of America/Merrill Lynch (BAML) indices provided by Bloomberg Financial Markets. The total returns shown for periods longer than a year are the annualized returns for the stated period.
2. Since inception performance for the Short-Term Strategy portfolios is calculated from January 31, 2006 to present.
3. For the 'Reserve Fund,' the BAML 1-5 Year Treasury Index became the performance benchmark on July 31, 2013. For prior periods, the BAML 1-10 Year Treasury Index was utilized.
4. Since inception performance for the 'BPCA Other Post Employment Benefits' is calculated from January 31, 2008 to present.
5. BPCPC Other Post Employment Benefits holdings were transferred and consolidated with BPCA Other Post Employment Benefits holdings on December 23, 2021

# Portfolio Recap – Market Drivers

## Economy

- ▶ The Consumer Price Index (CPI) came in below expectations, rising 3.0% year-over-year. Tariff passthroughs remain modest, though certain import-reliant categories are showing some inflationary pressures. The White House said the October CPI report will not likely be released, adding complexity to the Fed's decision-making process.
- ▶ The September and October jobs reports have not been released due to the shutdown. Available private-sector data along with new layoff announcements continue to show a cooling labor market.

## U.S. Treasury Yields

- ▶ Yields on 3-month, 2-year, and 10-year U.S. Treasuries ended the month at 3.81%, 3.57%, and 4.08% representing decreases of -12 bps, -3 bps, and -7 bps, respectively. Falling Treasury yields continue to push mortgage rates lower, and they reached a three-year low of 6.31% at the end of October.
- ▶ Lower yields in October drove positive returns across fixed income indices. The ICE BofA 3-month, 2-year, and 10-year U.S. Treasury indices returned +0.35%, +0.31%, and +0.78%, respectively..

## Federal Reserve

- ▶ The Federal Reserve (Fed) cut the target range for the federal funds rate at the second consecutive meeting to a three-year low of 3.75% to 4.00%.
- ▶ Despite the lack of official economic data due to the government shutdown, Powell stated that available data suggest the outlook for employment and inflation remains unchanged since the last meeting. However, he emphasized another rate cut in December is “far from” a foregone conclusion.

## IV. Market Commentary

## Summary

- ▶ The third quarter of 2025 saw a gradual easing of uncertainty as markets digested the lingering effects of a complex tariff rollout. While the effective tariff rate remains elevated, the avoidance of worst-case trade outcomes helped stabilize investor sentiment. Equity and bond markets rebounded, supported by steady consumer spending and business investment.
- ▶ The labor market continued to soften as job creation surprised to the downside in July and August. The unemployment rate rose during the quarter but remained below its 30-year average.
- ▶ Rising goods prices and sticky services costs continued to keep core inflation well above the Federal Reserve's (Fed) 2% target. Certain import-reliant goods showed signs of modest tariff passthroughs.
- ▶ In September, the Fed delivered its first rate cut of 2025, lowering the federal funds target range to 4.00% to 4.25%. Fed Chair Jerome Powell described it as a "risk management cut" reflecting growing concerns over the labor market. The median forecast from the Fed's September "dot plot" showed an additional 50 basis points (bps) of rate cuts this year, 25 bps more than its June projections.

## Economic Snapshot

- ▶ U.S. inflation accelerated modestly during the third quarter as certain goods categories began to reflect tariff-related cost pressures and services inflation remained sticky. Headline CPI rose to 2.9% year-over-year, and core CPI (ex-food and energy) edged up to 3.1%. Fed Chair Powell noted tariffs have begun to push up goods prices though these effects are expected to be short-lived.
- ▶ U.S. real gross domestic product (GDP) rebounded to 3.8% in the second quarter, driven by a reversal of the trade and inventory dynamics that weighed on Q1 growth. Despite labor market softness, consumer spending proved resilient, largely supported by continued spending from higher-income households. Business investment also remained strong.
- ▶ The labor market continued to cool with new net job creation nearing zero and the unemployment rate ticked up to 4.3%. Despite these signs of slowing, layoffs remained low, suggesting employers are adopting a "no hire, no fire" approach.

## Interest Rates

- ▶ The U.S. Treasury yield curve steepened further in Q3, led by a decline in short-term yields. Maturities less than one year fell 30-40 bps as markets reflected new Fed rate-cutting expectations. Longer-dated maturity yields from three to 30 years also fell but to a lesser extent after concerns over fiscal deficits and tariff-related inflation eased slightly.
- ▶ The 3-month U.S. Treasury ended the quarter at 3.94%, over 35 bps lower. The 2- and 5-year Treasuries fell by 11 and 6 bps to 3.61% and 3.74% respectively. The 10- and 30-year U.S. Treasury fell by 8 and 4 bps to 4.15% and 4.73% respectively. Bond volatility has continued to fall significantly from April highs and has now reached the lowest levels in three years.
- ▶ As a result of lower yields over the quarter, bond indexes generated positive total returns for the quarter. The ICE BofA 3-month, 2-, 5-, and 10-year U.S. Treasury indices returned 1.08%, 1.01%, 1.17%, and 1.81% for the quarter, respectively.

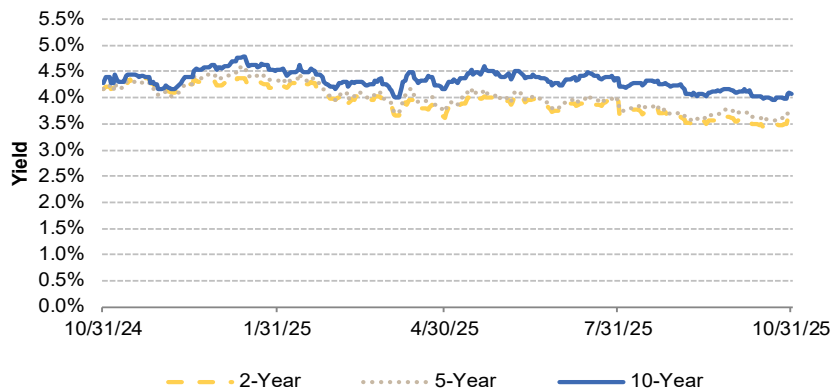

## Sector Performance

- ▶ Excess returns were strong across investment grade sectors as April's spread widening fully reversed on positive trade news and resilient economic data.
- ▶ Federal agency and supranational spreads remained low and traded in a narrow range throughout Q3. Excess returns remained muted in part due to limited issuance, which is a trend we expect to continue.
- ▶ Investment-grade (IG) corporate bonds generated strong excess returns as spreads narrowed to multi-year lows across most maturities. Lower-quality and longer-duration bonds led performance, supported by strong investor demand.
- ▶ Asset-backed securities (ABS) spreads tightened but remain modestly elevated versus 12-month lows. While excess returns were positive, they lagged those of IG corporates. Auto loan collateral modestly outperformed credit card-backed securities.
- ▶ Agency-backed mortgage-backed securities (MBS) delivered solid performance with positive excess returns across the board. Longer-duration MBS stood out as a top-performing IG sector in Q3. Agency-backed commercial MBS (CMBS) also posted positive excess returns for the quarter.
- ▶ Short-term credit (commercial paper and negotiable bank CDs) yields declined as Treasury issuance surged and the Fed cut rates. Short-end yield spreads widened over the quarter and demand remained strong as investors viewed the sector as a hedge against future rate cuts.
